## Education

### University of Melbourne

Melbourne, Australia

DOCTOR OF PHILOSOPHY (THEORETICAL PARTICLE PHYSICS)

2016 – 2019

- Research topics: Lepton-flavour non-universality, radiative neutrino mass, machine learning and data analysis in high-energy physics
- Primary supervisor: Prof. Raymond VOLKAS

### University of Melbourne

Melbourne, Australia

MASTER OF SCIENCE (WITH DISTINCTION)

2014 – 2016

- Thesis title: Neutrino mass through leptoquarks: a new radiative model and its experimental prospects
- Explored the 13 TeV reach of a radiative neutrino mass model derived from a dimension-7 lepton-number violating effective operator. The model involves two scalar leptoquarks with complementary high-energy and flavour phenomenology
- Supervisors: Prof. Raymond VOLKAS and Prof. Elisabetta BARBERIO
- Average mark (including coursework): 87%

BACHELOR OF SCIENCE

- Average mark: 80%
- Specialisations: Physics, Neuroscience, Ancient Languages
